## SUMMARY

Computer Science undergraduate and full-stack developer building end-to-end web applications across the JavaScript/TypeScript ecosystem. Shipped three full-stack projects spanning e-commerce, content management, and real-time messaging, using AI-assisted workflows to sharpen problem-solving and ship production-quality code faster. Solved 70+ DSA problems on LeetCode and reached 6 kyu on Codewars.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

**Frontend:** React, Vite, Tailwind CSS, Framer Motion

**Backend:** Node.js, Express.js, REST APIs, WebSockets (Socket.io), JWT Authentication, RBAC

**AI/ML:** LLM API Integration, Prompt Engineering, Retrieval-Augmented Generation (RAG), LangChain

**Databases:** PostgreSQL, MongoDB, Prisma ORM

**Tools & Platforms:** Git, GitHub, VS Code, npm, pnpm, Postman, Prettier, Jest, Vercel, Render, Railway, Neon, Linux

## PROJECTS

**Nexus Messaging App - Real-Time Messaging Platform** *nexus-messaging-app.vercel.app*

**Technologies:** React, Node.js, PostgreSQL, Socket.io, Prisma, Tailwind CSS, Gemini API

- Developed a real-time messaging app using WebSockets and optimistic state management for zero-latency delivery, with cursor-based infinite scrolling
- Integrated the Google Gemini API to power an AI copilot for chat summarization and task extraction, and implemented RBAC to secure group chat management

**PahariKnits - Full-Stack E-Commerce Platform** *pahariknits.in*

**Technologies:** React, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS, JWT, Razorpay API

- Built a full-stack e-commerce platform enabling secure, passwordless OTP-based checkout for handcrafted apparel purchases
- Designed a cart-aware inventory system and JWT-secured admin dashboard to sync stock, prevent overselling, and manage reverse logistics

**MyDevBlog - Full-Stack Decoupled CMS Platform** *mydevblog-theta.vercel.app*

**Technologies:** React, Vite, Node.js, Express, PostgreSQL, Prisma ORM, Tailwind CSS, JWT

- Architected a monorepo-based blogging platform with a public reading client, a central REST API, and a role-based admin CMS (RBAC)
- Implemented stateless JWT authentication and embedded the TinyMCE rich-text editor for a fully responsive content-management workflow

## EDUCATION

**Sri Sai University - B.Tech, Computer Science and Engineering** *Himachal Pradesh, India*

2024 - Present

**Maharaja Agarsain Public School - Class X & XII** *Delhi, India*

2010 - 2024

## CERTIFICATIONS

- National Level Online Coding Competition - Validated advanced programming skills and logical reasoning through a competitive national-level assessment
- Inter University TECH Utsav - 1st Place, technical debugging event; identified and resolved complex errors under time pressure
- McKinsey.org Forward Program - Completed a professional development program focused on problem-solving, communication, adaptability, and professional effectiveness
