## ABOUT ME

I am a full-stack software engineer building secure, scalable web applications within the JavaScript ecosystem. My expertise centers on engineering robust backend logic using Node.js, Express, and PostgreSQL, alongside designing highly responsive UIs.

## EDUCATION

|                                                                              |                                   |
|------------------------------------------------------------------------------|-----------------------------------|
| <b>Sri Sai University</b> , <i>Btech CSE</i>                                 | 2024 – Present   Himachal Pradesh |
| <b>Senior Secondary Certificate</b> , <i>Maharaja Agarsain Public School</i> | 2022 – 2024   Delhi               |
| <b>Secondary School Certificate</b> , <i>Maharaja Agarsain Public School</i> | 2010 – 2022   Delhi               |

## PROJECTS

### PahariKnits — Full-Stack E-Commerce Platform

[paharikhits.in](https://paharikhits.in) 🔗

Technologies: **React, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS, JWT, Razorpay API.**

- Built a full-stack e-commerce web application that allows users to securely purchase handcrafted apparel using passwordless OTP authentication.
- Implemented a cart-aware inventory system and a JWT-secured admin dashboard to synchronize database stock, prevent overselling, and manage reverse logistics.

### MyDevBlog — Full-Stack Decoupled CMS Platform

[mydevblog-theta.vercel.app](https://mydevblog-theta.vercel.app) 🔗

Technologies: **React, Vite, Node.js, Express, PostgreSQL, Prisma ORM, Tailwind CSS, JWT.**

- Architected a scalable **full-stack blogging platform** using a monorepo structure to separate a public reading client, a central **REST API**, and a private admin CMS secured by **Role-Based Access Control (RBAC)**.
- Implemented stateless **JWT authentication** for secure content management and integrated the **TinyMCE (Tiny Cloud) rich-text editor**, ensuring a fully responsive experience across all devices.

### Nexus Messaging App

<https://nexus-messaging-app.vercel.app/> 🔗

Technologies: **React, Node.js, PostgreSQL, Socket.io, Prisma, Tailwind CSS, Gemini API.**

- Engineered a real-time messaging app utilizing WebSockets and optimistic state management to ensure zero-latency message delivery, while optimizing database queries for state tracking and cursor-based infinite scrolling.
- Integrated the Gemini API to deploy an embedded AI Copilot for automated chat summarization and task extraction, and implemented Role-Based Access Control (RBAC) to securely manage group chat environments.

## SKILLS

**Frontend** — React, TypeScript, JavaScript, Tailwind CSS, Vite

**Backend** — Node.js, Express, REST APIs, Socket.IO

**Database & Tools** — PostgreSQL, Prisma, SQL, Git, GitHub, Postman

**DSA** — Solved 60+ LeetCode Problems

## CERTIFICATES

**McKinsey.org Forward Program:** Completed a professional development program focused on problem-solving, communication, adaptability, and professional effectiveness.

**National Level Online Coding Competition:** Validated advanced programming skills and logical reasoning through a competitive national-level assessment.

**Inter University TECH Utsav:** Secured 1st place in a competitive technical debugging event by rapidly identifying and resolving complex errors within provided source code.
